

VS Safety is a world-leading provider of wireless security and home automation solutions. Our company is well recognized for the track record of technological innovations and for the high quality of our products.

Accessories

Introduction

IRP-9 Pet immune version is designed to ensure the excellent performance of its original purpose in the security sense and in addition, eliminate the chance of false alarms caused by pets when using a PIR detector.

It signals the Control Panel to activate the alarm if an intruder crosses its' path of detection, but will not cause a false alarm by a dog up to 27kilos, cats, or numerous rodents.

Specifications

Power Supply: 3.6V 2200 mAh Lithium Battery
Current Consumption: idle: 12uA; RF Transmission: 15mA
Low battery detection: 3.2V±10%
Battery life: 48-60 months - Automatic Power Saving
Radio frequency: 868 or 433 MHz

Code combination: 16,777,216 codes with code hopping
Detection range: 12 meters at 90 degrees angle
Tamper protection - Supervision signalling
White light noise rejection: up to 6000 Lux
Operation Range: 300m in open space.
Operating temperature: -20C ~ +45C
Dimension: 93,5mm (L) x 63,6mm (W) x 41,7mm (H)
